youtube.com/watch?v=1E-ILwCAumA

Motivation 1: Newton's equation of gravity

- Suppose one has a system comprising of n particles having masses m_1, m_2, \dots, m_n . The force on k th particle due to others is given by

$$F_k = -m_k \sum_{i=1, i \neq k}^n \frac{Gm_i}{|r_i|^3} r_i \quad (3)$$

where $r_i = x_k - x_i$.

- Since the velocity of each particle depends on the force acting on it through the relation

$$m_k \frac{dv_k}{dt} = F_k \quad (4)$$

it is important to be able to compute the force on the particles to track their movement in the space.

- Thus to track these n particles in space with time, we should compute the forces F_1, F_2, \dots, F_n and then use Newton's second law to update their position.

5. Students' Seminar on Romanticism organized by Department of English

Date: 20.04.2022

EVENTS / PROGRAMMES / SEMINARS ORGANISED BY THE DEPT. OF ENGLISH

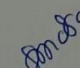

VIVEKANANDA MAHAVIDYALAYA, EAST BURDWAN

1. Name of the Event: **Students' Seminar**
2. Date: **20.04.2022**
3. Place: College Seminar Hall
4. Topic: **Romanticism**
5. Students Present: 67

Outcome of the Event: Organising Students' seminar is a regular event of the department. The sole purpose being a greater academic engagement and participation of the students. The topic, Romanticism, though a vast one, was very carefully arranged and organised by the students. They spoke in group; each group ascribed a specific aspect of Romanticism and a list of associated poets. The participation was maximum. And the faculty was pleasantly surprised to see many a student's otherwise shy, participate with much enthusiasm and aplomb.
